

Amendments to the Drawings

Proposed drawing corrections are submitted herewith for Figs. 4 and 5. In Fig. 4, reference number 106 (referring to a mobile client) is corrected to 100, in alignment with its usage on Page 9 of the specification (and as shown in Fig. 1). Block 506 of Fig. 5 is amended to refer to a "response receiving interface", rather than a "request receiving interface", as this block corresponds to Block 403 of Fig. 4. No new matter is introduced with these proposed drawing corrections.
